

ZUO EN

Backend Developer

CONTACT

Tianjin, China

POSITIONING

- Backend systems for web and AI products
- API architecture and service integration
- Database, cache, and queue design
- Cloud-native deployment workflows
- Reliable production delivery

TECHNICAL STACK

Backend: Python, Go, Node.js, FastAPI, Flask, Express, gRPC

Data: PostgreSQL, MongoDB, Redis, vector databases

Cloud: Docker, Kubernetes, AWS, GCP, CI/CD

Systems: REST APIs, auth, queues, workers, monitoring

SERVICES

- Backend API development
- Database schema design
- System integration
- Cloud deployment support
- Performance optimization

STRENGTHS

- Clean API architecture
- Production-focused mindset
- Database and cache optimization
- Reliable communication
- Maintainable backend delivery

Zuo En

Backend Developer | API Architecture, Cloud Services, Databases & System Integration

PROFESSIONAL SUMMARY

Backend Developer focused on building reliable APIs, scalable services, database-driven systems, and cloud-ready backend infrastructure. Experienced with Python, Go, Node.js, FastAPI, Express, gRPC, PostgreSQL, MongoDB, Redis, Docker, Kubernetes, AWS/GCP, and CI/CD. Strong background in service architecture, authentication, data processing, integrations, performance optimization, and production delivery for web and AI-enabled platforms.

API & Service Architecture

REST/gRPC APIs, auth, validation, orchestration

Database & Cache Systems

schemas, indexes, Redis, data workflows

Cloud-Native Delivery

Docker, Kubernetes, CI/CD, AWS/GCP

Integration & Automation

third-party APIs, workers, queues, scheduled jobs

PROFESSIONAL EXPERIENCE

Beijing Anrally Technology Co., Ltd | Mar 2025 - Jan 2026

Backend Developer

- Designed and maintained backend services for business applications, API workflows, internal tools, and data-driven platform features.
- Built REST/gRPC service layers, authentication flows, database models, cache logic, and asynchronous job processing for production systems.
- Improved reliability through structured logging, error handling, deployment configuration, CI/CD support, and performance-focused refactoring.

Hunan Piizu Network Technology Co., Ltd | Dec 2023 - Jan 2025

Backend Developer

- Developed backend modules for web and mobile products, including user management, operational workflows, admin APIs, and third-party integrations.
- Worked with Node.js/Python services, PostgreSQL/MongoDB, Redis caching, Dockerized environments, and cloud deployment pipelines.
- Collaborated with frontend and product teams to define API contracts, optimize database queries, and deliver stable feature releases.

COLACO Technology Co., Ltd | Feb 2021 - Apr 2023

Backend Developer

- Built and enhanced backend APIs for client-facing platforms, internal systems, and service integration requirements.
- Implemented CRUD services, role-based access control, file/data processing, scheduled tasks, and external API connections.
- Strengthened practical experience in clean code, database design, testing, documentation, and production maintenance.

DELIVERABLES

Backend APIs

clean endpoints, auth, validation

Data Systems

schemas, migrations, cache, queues

Deployment

Docker, CI/CD, cloud-ready setup

EDUCATION

Taiyuan University of Science and Technology | 2015 - 2019

Bachelor of Computer Science and Technology

BEST-FIT PROJECT TYPES

Backend API Platforms

auth, roles, service logic, admin APIs

SaaS Backend Systems

multi-user workflows, subscriptions, scaling

AI-Enabled Backends

RAG, model APIs, embeddings, vector DB

Data & Integration Workflows

ETL, third-party APIs, automation jobs

WORKING APPROACH

- Clarify product workflow, data model, API responsibilities, integration points, performance goals, and deployment constraints before implementation.
- Design clean service boundaries, typed API contracts, practical database schemas, and maintainable cloud-ready delivery flows.
- Build with reliability in mind: logging, monitoring, error handling, secure configuration, testable code, and clear documentation.
