SUMMARY

Backend Developer focused on building reliable APIs, scalable services, database-driven systems, and cloud-ready backend infrastructure. Experienced with Python, Go, Node.js, FastAPI, Flask, Express, gRPC, PostgreSQL, MongoDB, Redis, Docker, Kubernetes, AWS/GCP, and CI/CD. Strong background in service architecture, authentication, data processing, integrations, performance optimization, and production delivery for web and AI-enabled platforms.

SKILLS

- **Backend Development:** Python, Go, Node.js, FastAPI, Flask, Express.js, gRPC, REST APIs, authentication, RBAC, Swagger/OpenAPI
- **Data & Caching:** PostgreSQL, MongoDB, Redis, schema design, indexing, migrations, query optimization, vector databases
- **Cloud & Infrastructure:** Docker, Kubernetes, AWS, GCP, CI/CD, deployment configuration, logging, monitoring
- **System Engineering:** service integration, queues, workers, scheduled jobs, file/data processing, performance tuning
- **AI Backend Support:** RAG workflows, embeddings, model APIs, vector search integration, inference service support

EXPERIENCE

Backend Developer

Beijing Anrally Technology Co., Ltd | Mar 2025 - Jan 2026

- Designed and maintained backend services for business applications, internal tools, API workflows, and data-driven platform features.
- Built REST/gRPC service layers with authentication, role-based access control, database models, Redis caching, and asynchronous job processing.
- Improved reliability through structured logging, error handling, deployment configuration, CI/CD support, and performance-focused refactoring.

Backend Developer

Hunan Piizu Network Technology Co., Ltd | Dec 2023 - Jan 2025

- Developed backend modules for web and mobile products, including user management, admin APIs, operational workflows, and third-party integrations.
- Worked with Node.js and Python services, PostgreSQL/MongoDB data stores, Redis cache layers, Dockerized environments, and cloud deployment pipelines.
- Collaborated with frontend and product teams to define API contracts, optimize database queries, and deliver stable feature releases.

Backend Developer

COLACO Technology Co., Ltd | Feb 2021 - Apr 2023

- Built and enhanced backend APIs for client-facing platforms, internal systems, and service integration requirements.
- Implemented CRUD services, role-based access control, file/data processing, scheduled tasks, and external API connections.
- Strengthened practical experience in clean code, database design, testing, documentation, and production maintenance.

EDUCATION

Taiyuan University of Science and Technology | 2015 - 2019

Bachelor of Computer Science and Technology
